Networking: REST APIs, JSON, URLSession, Alamofire, Moya
Persistence & backend: Core Data, Realm, UserDefaults, Firebase, Firestore
Architecture: MVC, MVP, MVVM, VIP, VIPER
Notifications & monitoring: Push Notifications, OneSignal, Firebase Crashlytics
Tools: Xcode, Git, GitHub, GitLab, Jira, Trello, Postman, Charles, Figma, App Store Connect
Dependency management: Swift Package Manager, CocoaPods

Professional Experience

EduOnline - iOS Developer

2022 - Present

- Develop and maintain educational, lead generation, and corporate iOS applications using UIKit and SwiftUI.
- Contribute to a corporate application serving 5,000+ users.
- Develop an application helping users explore universities and colleges.
- Collaborate with a cross-functional team of 10+ people using Scrum.

White & Fluffy - Junior iOS Developer

2021 | 4 months

- Developed UIKit applications for social media content creation, including custom highlights, stickers, and video editing.
- Worked within a team of 10 people using Scrum.

SimbirSoft - iOS Developer Trainee

2021 | 3 months

- Contributed to a pilot MVP of a charity-focused iOS application supporting people facing difficult life situations.
- Worked in a team of five developers using UIKit, MVC, and GitFlow.

Personal Projects

iSOLID - Learn Programming

iOS Developer | 2025 - Present

- Develop a programming education app with structured lessons, practical examples, and interactive learning materials.
- Build the interface with SwiftUI and MVVM, using Core Data for local persistence and Firebase and Firestore for cloud data.
- Collaborate with another iOS developer to deliver the app across iOS, iPadOS, and macOS.

STRAYLO - Helping Dogs & Cats

iOS Developer | 2025 - Present

- Develop an app helping people report and support stray, lost, and injured animals.
- Build reporting, community feed, pet-friendly places, and profile features.
- Work in a team of two using SwiftUI, MVVM, Firebase, Firestore, MapKit, and CoreLocation.
- Support iOS, iPadOS, and macOS.
